

# SUPERB UNIVERSAL ADHESIVE

**SUPERB**  
UNIVERSAL ADHESIVE

## The Single Bottle of Choice.

Easy...Versatile... SUPERB Universal Adhesive is THE single bottle bonding system for use in ALL dental restorations. SUPERB combines the etch, primer and bonding resin into a single component and single application protocol without requiring any activators or pre-treatments. This makes SUPERB easy to apply, extremely predictable, and eliminates technique sensitivity. Coupled with best-in-class bonding and the elimination of post operative sensitivity, SUPERB is The Single Bottle of Choice.

### Use SUPERB Universal Adhesive for:

- Direct Restorations: to seal enamel/dentin prior to restoring with light-cure or self-cure composite material
- Indirect Restorations: bonding light-cured, self-cured or dual-cured composite cements or glass ionomer or resin-modified glass ionomer cements
- Bonding CEREC® restorations
- Desensitization: to treat hypersensitive and/or exposed root surfaces
- Desensitizing crown preparations
- Sealing preparations before placing amalgams
- Bonding crowns and bridges
- Bonding in posts and cores
- Bonding veneers
